**DECLARATION FOR REISSUE APPLICATION UNDER 37 CFR 1.175**

Sir:

As below named inventors, we hereby declare that:

1. Our post office addresses and citizenship are stated below next to our names.
2. We verily believe that we are original, first and joint inventors of the subject matter which is described and claimed in the above-identified reissue application entitled "Method Of Transferring Data By Transmitting Lower Order And Upper Order Address Bits In Separate Words With Respective Op Codes And Start Information" (herein "the reissue application").
3. We have reviewed and understand the contents of the reissue application, including the claims, as amended by the amendment submitted herewith.
4. We acknowledge the duty to disclose information material to the patentability of the reissue application in accordance with 37 CFR 1.56.
5. We believe the original patent to be partly inoperative because we claimed less than we had a right

0955935-042600

to claim in the patent. In particular, we believe the claims in the original patent to be primarily directed towards devices that control memory devices, (e.g., transmitting memory requests to the memory device), or to be primarily directed towards apparatus external to a memory device (e.g., a computer system). We believe that it was error not to include claims directed to a method of operation within the memory device and that this error has unduly narrowed the coverage of the original patent. This error has been corrected in an amendment submitted herewith by submitting new claim 12 reciting a method of operation in a memory device.

6. All errors being corrected in the reissue application up to the time of filing of this declaration, including the above described error, arose without deceptive intent on our part.

We further declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
